# Surface Mount **Monolithic Amplifier**

## DC-4 GHz

#### **Product Features**

- DC-4 GHz
- Single Voltage Supply
- Internally Matched to 50 Ohms
- Low Performance Variation Over Temperature
- Transient Protected
- Aqueous washable
- Protected By US Patent 6,943,629

#### **Typical Applications**

- Cellular/ PCS/ 3G Base Station
- CATV, Cable Modem & DBS
- Fixed Wireless & WLAN
- Microwave Radio & Test Equipment

+RoHS Compliant The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

#### **General Description**

ERA-4XSM+ (RoHS compliant) is a wideband amplifier offering high dynamic range. It has repeatable performance from lot to lot. It is enclosed in a Micro-X package. ERA-4XSM+ uses Darlington configuration and is fabricated using InGaP HBT technology. Expected MTBF is 150 years at 85°C case temperature.

#### simplified schematic and pin description

| Function         | Pin Number | Description  |  |
|------------------|------------|--|--|
| RF IN            | 1          | RF input pin. This pin requires the use of an external DC blocking capacitor chosen for the frequency of operation.  |  |
| RF-OUT and DC-IN | 3          | RF output and bias pin. DC voltage is present on this pin; therefore a DC blocking capacitor is necessary for proper operation. An RF choke is needed to feed DC bias without loss of RF signal due to the bias connection, as shown in "Recommended Application Circuit". |  |
| GND              | 2,4        | Connections to ground. Use via holes as shown in "Suggested Layout for PCB Design" to reduce ground path inductance for best performance.  |  |

A Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document. B. Electrical specifications and performance data contained in this specification document are based on Min-Circuit's applicable established test performance criteria and measurement instructions. G. The parts covered by this specification document are subject to Mini-Circuit standard limited warranty and terms and conditions (collectivity, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuit's website at www.minicircuits.com/MCLStore/terms.jsp

\*Guaranteed specification DC-4 GHz. Low frequency cut off determined by external coupling capacitors.

#### **Absolute Maximum Ratings**

| Parameter                            | Ratings        |  |
|--------------------------------------|----------------|--|
| Operating Temperature <sup>(3)</sup> | -45°C to 85°C  |  |
| Storage Temperature                  | -65°C to 150°C |  |
| Operating Current                    | 85mA           |  |
| Power Dissipation                    | 417mW          |  |
| Input Power                          | 20 dBm         |  |

Note: Permanent damage may occur if any of these limits are exceeded. These ratings are not intended for continuous normal operation. <sup>(1)</sup>Measured on Mini-Circuits characterization test board TB-289. <sup>(2)</sup>Case is defined as ground leads.
 <sup>(3)</sup>Based on typical case temperature rise 5°C above ambient.

Notes
A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
